Big Words for Little Kids

This book contains daily exercise sheets that can be used for classroom use or at home. Only one sheet should be done per page. The words are suitable for children in grades 4th through 7th. They are organized along roots because this the best way learn a lot of new words quickly. The meaning of the words in some cases has been simplified to the comprehension level of this age group. Do not expect that the child will know these words after doing the worksheet once. This will probably be the first exposure to these words and child needs more time for these to sink in and become part of his permanent vocabulary.

A test is given after every five sheets. Child should get at least 10 correct out of the 15 words on each test.

Currently approximately 60 pages are included in this file. Join our mailing list and as this file is expanded, I will let you know. Please let me know if you use these sheets and what you think of them.
